

AIRINET GRIDVISOR™ ENERGY MANAGEMENT SYSTEM

It's time to put an end to the heating and of cooling empty rooms!

Designed to save energy and save money, the GridVisor™ system is breaking the barrier in the way energy cost are monitored in hotels, apartment complexes, dorm facilities, and office buildings. The GridVisor™ provides control to maintain and limit the temperature stats in any room in a facility.

Key Features & Benefits:

- **No Cables** - Wireless building network links an entire property together without expensive cables.
- **Software** – Airinet's advanced software solutions allow for the customization of all settings to control an entire facility.
- **Centralized** – Have full control from a centralized location such as a reception desk or office computer. No need to walk to each individual room.
- **Remote** - Manage the system remotely, from any computer with internet.
- **Expandable (Plug & Play)** Add the GridVisor™ to common areas, rooftops HVAC, lights, restaurant coolers, water heating equipment, and even pools, as required.

GRIDVISOR™

- Always know a facility's energy consumption.
- Instantly adjust temperatures in any room from a centralized location.
- Diagnose equipment and heating problems with Airinet's alert system.
- Be in full control of an energy infrastructure anytime anywhere.

Expecting a slow week? With one click on Airinet's EMS database, you have full control of an entire floor's climate which can lower energy consumption and save money.

Airinet's innovative software allows for customization of the layout of a facility to control the temperature of each individual room, groups of rooms, common areas, or the entire building/structure.

Other Featured Products:

Airinet's Wireless Broadband

- Dedicated network connectivity
- Point-to-Point services
- Custom wireless solutions
- Solar -powered networks
- Wireless-managed surveillance

Airinet Lumitrol™ modules provide real-time monitoring and control of streetlights in lighting networks large and small. As the cost of energy rises the need to ensure efficient use of energy becomes a necessity.

The Lumitrol™ modules cost effectively turn existing streetlights into "smart" energy conscious street lighting systems with a simple twist-lock photo controller replacement device.
